CUSTOM LEATHER PATCHES & BRANDED
PRODUCTS

Company Profile

RetroCraft is a South African manufacturing business creating customised leather products, branded headwear and corporate gifts for organisations that need locally produced, professionally branded products.

KEMPTON PARK, GAUTENG, SOUTH AFRICA
RETROCRAFT.CO.ZA · OCTOBER 2026

WHO WE ARE

Leather patches and branded products, made in our own workshop

RetroCraft began in embroidery. In 2022 we invested in a laser and started the product we are known for: a leather patch that carries a business's name, cut, engraved and stitched in Kempton Park, Gauteng.

That patch has grown into a working range: patch caps and beanies, patches on your own garments, engraved leather keyrings, hospitality pieces and engraving on wood. Every order starts with a proof you approve.

Making since	2022

Who we make for

Brands and branding agencies
Resellers and the promotional trade
Outdoor and safari companies
Fuel and industrial firms
Golf businesses
Hospitality venues

Our range

Every piece carries your brand. Each photograph is our own work.

Engraved leather patches

Our core product. Cut from genuine leather in 71 colours, laser-engraved with your logo, and supplied loose or stitched on.

Branded headwear

Trucker, snapback, dad and five-panel caps carrying an engraved leather patch, on caps we supply or caps you already have.

Beanies with leather labels

Cuffed beanies carrying an engraved leather label, for teams and crews through the colder months.

Engraved leather keyrings

A small, useful gift that carries your logo every day, engraved on the leather colour you choose.

Hospitality pieces

Coasters, table talkers, bill holders and menu covers in engraved leather and wood.

Engraving on wood

Boxes, lids, caddies and key holders, laser-engraved with your logo.

The full range, with leather colours, patch finishes and cap styles, is in our product catalogue.

From your logo to a finished product

Leather cutting

Patches are cut from genuine leather in our workshop, to the shape and size of each design.

Laser engraving

Logos and artwork engraved into leather and wood, from your own files.

Stitching

Patches stitched onto caps, beanies and your own garments, bags and workwear.

Finishing

Edges finished by hand before a piece is stitched or packed.

Proof and sample

A digital proof for every design, and a sample piece and photo before a run starts.

A batch of laser-engraved leather patches.

Embroidered, PVC/rubber and printed patches are made by specialist partners and managed by us. We say which is which on every quote.

How an order runs

1

Brief

Your logo, the products, the quantity and the date you need them.

2

Proof

A digital proof. Nothing is made until you approve it.

3

Production

Cut, engraved and stitched in Kempton Park, usually 3 working days after you approve your proof.

4

Delivery

Couriered anywhere in South Africa, or collected by your own driver.

Need them today?

Smaller runs can be ready the same day when booked. Same-day work depends on the day's schedule and on artwork that is ready to engrave, and it is priced as a rush order. Book before you send anything.

Branded products that people keep and use

For recognition, gifting, events and the everyday branding of teams and venues.

Employee recognition

Engraved leather pieces and caps that mark long service, milestones and team achievements.

Events and conferences

Caps, keyrings and engraved pieces for delegates, speakers and staff.

Teams and crews

Matching branded caps and beanies for staff, site crews and a new intake.

Visitor and induction packs

A branded cap and an engraved keyring for every visitor or new starter.

Client and executive gifts

Leather and wood gifts with your logo, in one consistent finish.

Hospitality branding

Menu covers, bill holders, table talkers and coasters for restaurants and hotels.

Campaigns

Branded headwear and keyrings that carry a safety, environmental or brand campaign.

Merchandise for the trade

Patches and patch caps made for agencies and resellers to supply to their own clients.

Why RetroCraft

1

Made locally, in our own workshop

Cutting, laser engraving and stitching happen in Kempton Park, Gauteng: South African production and local value creation.

2

Short, stated lead times

Usually 3 working days after you approve your proof; small runs the same day when booked; large runs on a date we agree when we quote.

3

Small runs to large

From 10 pieces per design, so a pilot order costs little to try and a programme can grow from it.

4

Approved before it is made

A digital proof for every design, and a sample piece and photo before a production run starts.

5

Custom, not catalogue

Shapes, sizes, leathers and finishes are chosen per design, and new pieces are developed and sampled to a brief.

6

A registered, VAT-registered supplier

Retro Craft (Pty) Ltd, with quotes, orders and tax invoices issued from one business system and a 6-month guarantee against manufacturing defects.
